

To join the Zoom Meeting:

Click on the link in the confirmation email that says:

Join from PC, Mac, Linux, iOS or Android: <https://zoom.us/s/XXXXXXXX>

The link will have a number unique to you. It should launch the Zoom website and bring up a pop-up dialog box that looks something like this:

If you don't get the pop-up, you may have pop-ups blocked in your browser.

Click on the "Open Zoom Meetings" button in the dialog box or if you don't have the dialog box, click on "click here" to try to open the dialog box and then click on Open Zoom Meetings. That should then launch the Zoom app and get you into the meeting.

If you cannot get the dialog box open, or if you are stuck on a screen that just says

"If nothing prompts from browser, [download & run Zoom](#)."

Then click on the "download & run Zoom" button which will download the Zoom app. You will then need to launch the downloaded app. If you are using the Chrome browser, the downloaded app will show up at the bottom left of your browser like this:

Clicking on that link should launch the meeting.
