# Royal Rosarian Rose Garden Contest

A Royal Rosarian Foundation and Portland Rose Festival Community event.

In 1938, the Royal Rosarian Rose Garden Contest was established as the first sponsored citywide event to honor the rose, the “Queen of flowers.” The contest was so popular that it immediately became an annual event. The Royal Rosarians are committed to continually improving the contest to showcase the best amateur rose gardens and commercial plantings in Portland, the City of Roses. The contest promotes greater appreciation for growing roses, honoring those citizens who help beautify Portland through their rose growing efforts and upholds the signature Royal Rosarian slogan “For You A Rose In Portland Grows!” The Royal Rosarians encourage all rose growers in the Portland Metropolitan Area to enter this contest.

Contributions in support of the Rose Garden Contest may be made to the Royal Rosarian Foundation at PO Box 8956, Portland, OR 97207-8956. Please write RGC on the memo line of your check.

The 2019 Application Packet is available on the Royal Rosarians and Royal Rosarian Foundation websites. Select Rose Garden Contest at the Events tabs.

## Definitions for the Rose Garden Contest

**Rosarian:** A person who grows roses or studies the rose in any or all of its forms.

**Royal Rosarian:** Any member of the organization called The Royal Rosarians, serving as the official greeters and ambassadors of goodwill for the city of Portland.

**Rose Garden:** An enclosure for displaying roses in a confined setting that does not include any other plant material of any kind. A formal rose garden often includes a focal point of a definable manufactured object such as a gazing ball, trellis, or fountain which may or may not be adorned with roses. Any combination of rose varieties may be used and the uniqueness of that use can be an enhancement to the garden and the judging condition of the rose garden.

**Rose Planting:** Any piece of ground used for rose cultivation that would not otherwise constitute a rose garden. It may include any random display of roses and may include other plants. English and cottage-style gardens, and curb parking areas are a perfect setting for rose plantings.

**Rose Garden Contest Judges:** Royal Rosarians and/or spouses and Rose Society Experts and/or spouses perform as judges in a fair and objective manner. An average of the judges determines your final score.

**Eligibility:** The contest is open to all rose growers within 20 miles of the Pioneer Courthouse Square, Portland, Oregon, as verified by electronic mapping system. No garden club membership is required to enter the contest.

**Portland City limits:** Boundary of approximately 92,600 acres from the Willamette River north, west into Cedar Mill neighborhood WA County, and south towards Lake Oswego, Clackamas County, as verified by “metromap.metro-region.org” (Boundaries). (Definition applied to Division 12, Beach Visibility)

**Winners:** Winning entries may not compete in Division for the next two calendar years following the winning year with the exception of Division 9 & Division 11, Section D.

## PROTOCOLS AND RULES

All rose gardens must be located within 20 miles of Pioneer Courthouse Square, Portland, Oregon, as verified with an electronic mapping system.

Divisions 1-10: Open to all residential gardens with or without help.

Divisions: Winning entries may not compete in Division for the next two calendar years following the winning year with the exception of Division 11, Section D. It is important that everyone understands the restrictions for each division so entries can be submitted correctly. Example: Winners from 2016 or prior are eligible to enter the 2019 contest.

Records of previous winners will be referenced; however, participant's sense of fair play is relied on to not enter divisions or sections that they have previously won. The contest hopes to give every qualifying gardener within the contest area the experience of entering and competing in the Rose Garden Contest.

Please do not put unnecessary pressure on yourself. All entrants in each division and section will be judged fairly and objectively. Good luck and have fun!

## JUDGE'S CRITERIA

**Design and Layout of Roses (15 points):** The rose garden or rose planting layout must meet the definitions discussed on page 3 of this application package. All types of rose displays should have adequate sunshine (no less than 6 hours a day) and be designed for ease of maintenance to promote optimum growth and resistance to disease. Spacing should be appropriate to rose type and the overall design of the garden or planting.

Optimum spacing distance between plants:

- Shrubs and Grandifloras: 36"
- Hybrid Teas: 30"
- Floribundas: 24"
- Miniature Roses: 12"

**Soil Condition (15 points) :** Adequate mulching is desirable, but it should not be heaped around and above the canes. Soil needs to be cultivated to eliminate weeds and keep the soil loose.

**Pruning (15 points):** The plants should be trimmed for proper form and structure. Crossing and dead canes need to be removed and centers opened. The amount of live wood removed during pruning is considered to be an individual preference and does not affect the score.

**Maintenance (30 points):** Continued grooming along with a diligent fertilizing and spraying schedule is very important in order to maintain good health, strong growth, and overall beauty of the roses. Spent blooms must be removed and fallen petals and leaves picked up. Severe disease infection or insect damage is an indication of poor maintenance. Individuals who have adopted alternative forms of pest management and can effectively keep their garden clear of pests using methods other than spraying will be judged the same as those using the traditional spray regimens. More importantly, the cleanliness of the garden will influence the score.

Maintenance scoring:

- Grooming: 10 points
- Disease control 10 points
- Insect control: 10 points

**Vigor (15 points):** The size of the blooms, canes and foliage, together with healthy growth on upper canes, and the indication of new basal breaks will show if a balanced feeding program is being followed. Vigor also indicates the plant's ability to fend off pests and renew itself during the growing season.

**Bloom Quality (10 points):** Consideration will be given to the climatic conditions affecting the number and quality of blooms.

## **DIVISIONS AND SECTIONS**

**Divisions 1-10 are open to any Residential Garden regardless of help. Division 11 is Commercial Only. Divisions 1-12 Note:** Winning entries may not compete in Division for the next two calendar years following the winning year with the exception of Division 9 & Division 11, Section D.
