

Project Name	El Negrito Gravity Water System
Date of Application	July, 2004
Country	Honduras
Sponsoring Club	Harbourside
Host Club identified & capable.	CR de Comayagua recommended by PSG Jack MacAuly
Project Goal(s)	Provide clean running water to a rural community of 1000 people
Project Description	Rotary funds paid for pipe and skilled labour and the community provided manual labour to lay pipe in very rugged terrain from a spring some 6 km. distant. Community was also organized with a water committee to maintain the water system with small payments from the users.
Needs Assessment?	Provided by host club. People were gathering water from polluted streams, some of which were a distance from their homes.
RI Areas of Focus Supported	Health and sanitation
Eligible for Grants?	Yes
Successive Projects?	First of many
Sustainability?	Yes, communities were organized to maintain the system
Political Stability in Host country	Ok
Identify any Risks	Communities were quite remote from Comayagua
Project Budget	<ul style="list-style-type: none"> • Pipe & fittings \$10,500 • Bricks and Concrete \$ 2,630 • Skilled Labour \$ 1870 • Municipality (freight) \$ 1700 • Topographic survey \$ 1500 • Donated by community in kind <u>\$ 1000</u> • Total \$19,200
