

Profile of Jeanie Morgan, PDG 5490

Jeanie Morgan is currently a member of the Rotary Club of Mesa West. She has been a Rotarian since December, 1994, when she joined the London Bridge Rotary Club. While in Lake Havasu, she served a few terms as Treasurer, was Club President in 1999-2000. Jeanie first got involved with Rotary beyond the club level when she served as Registrar for RYLA at Camp Pinerock.

Jeanie enjoyed the international understanding many of Rotary's programs promote and got involved in hosting inbound youth exchange students and GSE teams. In the spring of 2005, she led an outbound team to District 4180 in Mexico. She served on District Bylaws, Nominating, Simplified Grants and Finance Committees for District 5490. She was honored to serve as District Governor of that district in 2009-10. She is currently serving on the Finance Committee of the newly combined District 5495.

After serving as District Governor, Jeanie had to take some time off from positions in Rotary that involved travel as family caregiver responsibilities became her priority. Consequently, she did not take the route of many PDG's of serving at the Zone or International Level. After losing her husband in November, 2017, Jeanie again has time to find ways to help effect positive change through Rotary-related service. She joined The Rotary Vocational Fund of Arizona board in February, 2018.

Jeanie has retired from two careers – the first retirement was in 2006 from the banking and financial services industry. The second was from a small health-related non-profit in Lake Havasu. She now lives in Chandler and transferred to the Mesa West Rotary Club in January, 2017. She manages their website, weekly electronic newsletter, and Facebook page. One of the first things she volunteered to do with TRVFA was convert their website to the ClubRunner platform, so it can be used to enhance donor, scholar, and inter-Rotary communication.

She wants to use these vehicles to inspire a higher level of financial support. If more people and organizations give, we can help more students find pathways to sustainable futures through TRVFA
