Why do some changes fail?

When you incorporate each element of the change plan, you have a better chance of succeeding. Leaving out any element makes the process more difficult, and eliminating more than one may also eliminate your chance of success. Review the chart to understand what may happen without that item.

Vision	Collaborative Commitment	Skills	Rewards	Resources	Action Plan
If you don't explain your vision clearly, people may be confused about the purpose of the change, leading to an incomplete or failed implementation.	People might not commit to a change if they feel that they weren't included in the planning or implementation.	If people lack the skills they need to make the change, anxiety about their lack of knowledge or expertise can lead to resistance.	People may be slow to adopt the change if they don't see the benefits of embracing it.	A lack of resources makes it difficult for people to learn what they need to know. That can cause frustration and resistance to change.	The change you are trying to implement may not get started at all if you haven't thoroughly planned for it.
