

Thailand RAGAS Team (TRAGAST) Strategic Plan – July 2024 - June 2027

Last Update 7 May 2024

Vision

Thailand region free of Human Trafficking

Mission

Enable and assist our community to take action to eliminate human trafficking and human exploitation through awareness and specific community projects, especially prevention.

Focus

Training to Prevent Child Human Trafficking.

Values

- Ending Human Trafficking will require a well-organized approach against a well-organized infrastructure of traffickers.
- Human Trafficking is preventable through education, legislation, and advocacy.
- We believe that most of our efforts should be in the arena of prevention, especially the prevention of child trafficking.
- Rotary Thailand is uniquely positioned to end human trafficking through its ability to pull organizations together for a common humanitarian cause.
- Thailand Rotary Action Group Against Slavery Team (TRAGAST) can effectively engage local communities to end human trafficking in Thailand.
- Partnering with other organizations increases our capacity to end human trafficking / modern slavery in Thailand and the Mekong region. (All Rotary Clubs in Vietnam, Laos, Cambodia, and Myanmar are in Thailand Rotary Districts 3330, 3340, 3350, 3360)

Goals:

1. To prevent and stop human trafficking, by educating every child in Thailand about the dangers of human trafficking.

2. Increase awareness among communities in Thailand about the human trafficking, and especially within the Rotary Community

Strategies:

I – Collaboration –

- To achieve our goals, we will establish strong working relations with non-government organizations and institutions involved in human trafficking awareness and prevention. We will not be involved in rescue operations and post trafficking rehabilitation.
- Our collaboration will involve linking up Rotary clubs mainly from Thailand, but also from outside Thailand, with trafficking prevention organizations and institutions in Thailand and the Mekong region, so as to jointly develop trafficking prevention community projects.
- Trafficking prevention community projects could be initiated by prevention organizations and institutions, or by Rotary Clubs. Our awareness activities will help Rotary Clubs understand the importance of human trafficking prevention.
- One of our priorities will also be to involve Rotaract clubs in the collaboration with human trafficking prevention organizations and institutions.
- Based on a set of criteria, a list of collaborating organizations and institutions will progressively be developed.
- Finally, at the international Rotary level, TRAGAST will maintain working relations with the Rotary Action Group against Slavery (RAGAS).

II – Prevention

- Our main objective and activity will be human trafficking prevention, mainly targeting young people between 5-20 years old, in particular from at risk areas.
- For this purpose, we will help develop together with Rotary clubs and collaborating non-government organizations, human trafficking awareness and prevention community projects, mainly financed by Rotary Clubs.
- Community projects will target principally schools, youth centers, at risk communities, and communities of parents. Projects can be initiated by collaborating organizations and institutions or by Rotary clubs.
- Success will be measured by the number of trafficking prevention community projects implemented within any Rotary Year.

III – Awareness

- The TRAGAST team will develop awareness programs targeting mainly Rotary clubs in Thailand and the Mekong region, so as to make them aware of the dangers of human trafficking and encourage them to support human trafficking prevention projects.

- TRAGAST will also use presentations and social media as well as other means to raise awareness.
- Awareness initiatives must be clearly targeted at the right audience i.e. communities at risk or supportive Rotary clubs
- Rotary and Rotaract clubs will be the main target of the TRAGAST awareness program.

IMPLEMENTATION PLAN

- TRAGAST will be led by a mixed team of Rotarians, both Thais and foreigners.
- TRAGAST must be very sensitive to the cultural context in Thailand and the Mekong region.
- Most human trafficking prevention and awareness material will be developed in the Thai language and other regional language as needed.
- TRAGAST must make sure its prevention community projects and awareness programs are appropriately targeted.
- A two-year rolling implementation plan with concrete objectives will be developed during the first month of each Rotary year.
- TRAGAST will maintain a website where the latest information is uploaded. The pages will be in English and Thai languages.
- A database of possible collaborating non-government organizations will progressively been built up.
