

Eliminate manual data entry of your club's attendance!

The barcode scanner solution consists of a portable barcode scanner, software to accept data download of attendance to a PC, and an upload feature in ClubRunner to accept data from the PC and integrate it into the club's attendance report via a web service. The software will also generate barcode labels for each member.

Barcode Scanner Module makes attendance tracking easier

Struggling with manual data entry for your weekly attendance? ClubRunner can help with the Barcode Scanner Module, available as an add-on. It works with your ClubRunner website to allow you to scan barcodes for your members and uploads the information directly to your site. Integrating with your Attendance Manager, it will keep all your data on your site so you can continue to run your reports as usual.

Portability and Convenience

The Barcode Scanner Module uses a small scanning device, about the size of a pager. Since it's portable and cordless, you don't need to set up a computer or have Internet connection at your meeting venue. Simply bring along the handheld scanner, scan your member badges then take the device back to your office and download to your computer. With ClubRunner's integrated barcode module, your attendance will get uploaded to your website and integrate with your existing records and reports.

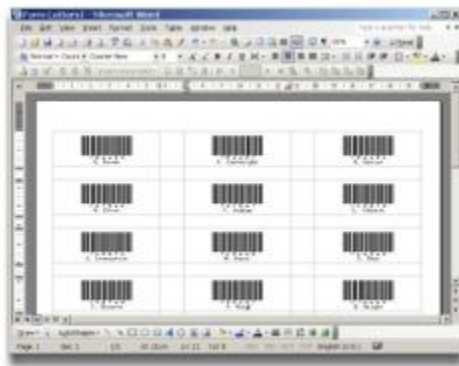

Print barcode labels directly from your printer

ClubRunner's Barcode Scanner Module will also print your barcode labels for you! Simply choose the members from your list, and a merged report containing the barcodes and names will be created within Microsoft Word.

Insert the standard Avery label sheets into your printer and you're all set!

The Barcode Scanner Module can also work with pre-made barcode labels if this is preferred. Either way, attach barcode labels to the backs of membership cards or badges for easy scanning. Or, have a printout of all member barcodes handy at registration to easily scan members as they sign in.

Pricing

Hardware

The recommended portable barcode scanner is CS3000 Motorola Scanner which sells for \$250.

Software License

The one-time cost for the barcode scanner program depends on the size of the club:

Under 100 members	\$395
100 to 250 members	\$495
250 to 400 members	\$695
400 to 600 members	\$795

This cost represents a club-wide license for unlimited users to install and use the software on their computers as well as utilize the web upload service for the lifetime of the club's subscription, interruptions permitted.

The software comes with a 90-day satisfaction guarantee. Pricing above is in US Dollars.
